### EWG GREEN GRADE

This refers to a product that has minimal impact on the environment and health. Green ratings are generally given to products that have minimal negative impacts on the environment and health.

- Use of eco-friendly ingredients
- skin affinity

## Germany Dermatest is complete!

This product passed the German Derma Test after being evaluated or stability and skin compatibility. This evaluation confirms that the product has minimal skin impact and is generally non-irritating and safe to use.

For people with sensitive skin or allergic reactions  
It can be used more safely. Additionally, these products  
It can help maintain skin health,  
It may also be recommended for people with skin problems.

# Excellent

Highest level certification

German derma test, non-irritating to the skin

# PH scale

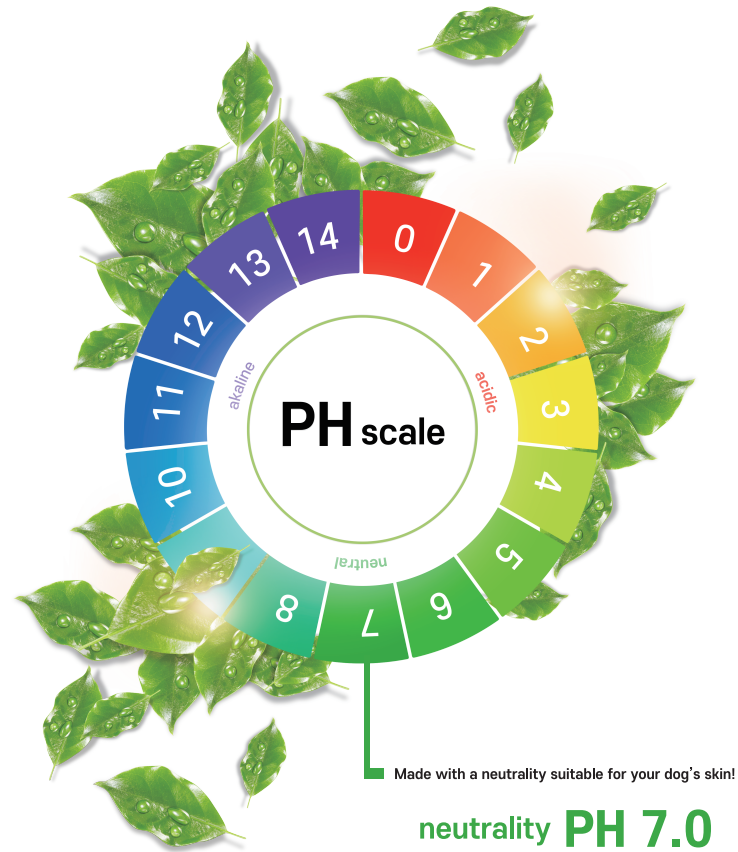

MASCOTA MINI PET TISSUE : neutrality PH 7.0

human skin : slightly acidic PH 5.0~5.5

dog skin : neutrality PH 7.0~7.5

Made with a neutrality suitable for your dog's skin!

Let's know and use the PH scale well

Q What happens if you use mildly acidic wet wipes made for human skin on your dog?

1. The ingredients used in wet wipes may not be suitable for your dog's skin and may cause allergies.

2. Weakly acidic wet wipes for humans can break the PH balance of your dog's skin, which can cause skin health problems.
